PATENT AND TRADEMARK OFFICE NOTICES

Patent Cooperation Treaty (PCT) Information

For information concerning the PCT member countries see the notice appearing in the *Official Gazette* at 1052 O.G. 52 on Mar. 26, 1985.

For use of the European Patent Office as Searching Authority for PCT applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52 on Sept. 28, 1982.

Certain domestic PCT fees for international applications have been changed effective Oct. 5, 1985 in the rule change notice titled "Revision of Patent Fees" published at 1057 O.G. 24 on Aug. 20, 1985.

The Search fee of the European Patent Office has been changed as of Feb. 9, 1986 and is announced in the *Official Gazette* at 1061 O.G. 30 on Dec. 31, 1985.

International PCT fees have been changed effective Jan. 1, 1986 and were announced in the *Official Gazette* at 1061 O.G. 30 on Dec. 31, 1985.

Note that the amount of the international search fee for the European Patent Office and the amounts of the International PCT fees will change effective June 1, 1986. For information on these fee changes see the notice appearing in the *Official Gazette* at 1065 O.G. 41 on Apr. 29, 1986.

The current schedule of PCT fees is as follows:

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on applications filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Oct. 5, 1985. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the grant.

Attention is drawn to the patents which were issued on Sept. 6, 1983, for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,402,091 through 4,403,352
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months are set forth in 37 CFR 1.20(e) and (h), as amended effective Oct. 5, 1985, which are reproduced below:

37 CFR §1.20 Post-issuance fees

"(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant . . . $ 225.00"

"(h) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:
By a small entity (§1.9(f)) . . . . . $ 225.00
By other than a small entity . . . . . $ 450.00"

The amounts of the surcharges as amended effective Oct. 5, 1985, are set forth in 37 CFR 1.20 (k) and (l) which are reproduced below:

"(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982 . . . . . $ 110.00"

"(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:
By a small entity (§1.9(f)) . . . . . $ 55.00
By other than a small entity . . . . . $ 110.00"

Section 1.20 paragraph (m) as amended as a result of enactment of Public Law 98–622 effective Nov. 8, 1984, is reproduced below:

"(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay in payment is shown to the satisfaction of the Commissioner to have been unavoidable . . . . . $ 500.00"

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Use of Color Drawings in Utility Patents

Under 37 CFR 1.84, the drawings of a utility patent application must be in black and white. However, on occasion, color drawings may be necessary under 35 U.S.C. 112. In this circumstance, the Patent and Trademark Office will entertain a petition under 37 CFR 1.183 to waive the requirements of §1.84 to the extent that color drawings on DIN size A4 sheets (21.0 by 29.7 cm.) will be accepted for the purposes and under the conditions set forth below.

The petition must be accompanied by five (5) sets of color drawings on DIN size A4 sheets (21.0 by 29.7 cm.) for examination, copying and archival purposes. In light of the substantial administrative and economic burden associated with printing a utility patent with color drawings, the Letters Patent and the patent copies which are printed at issuance of the application will depict the drawings in black and white only. However, copies of the patent with color drawings will be provided by the Patent and Trademark Office upon special request and payment of the fee necessary under 37 CFR 1.21(k) to recover the actual costs associated therewith.

Accordingly, the petition must also be accompanied by a proposed amendment to insert the following language as the first paragraph in the portion of the specification containing a brief description of the drawings:

> The file of this patent contains at least one drawing executed in color to meet the requirements of 35 U.S.C. 112. Copies of this patent with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee.

Such a petition will be granted only when color drawings are determined to be necessary under 35 U.S.C. 112. The petition should be directed to the Office of the Deputy Assistant Commissioner for Patents.

RENE D. TEGTMEYER,
Aug. 6, 1986. *Assistant Commissioner for Patents.*

Unity of Invention Practice in International Applications and National Phase Applications Entered Under 35 U.S.C. 371

The purpose of this notice is to set forth procedural guidelines for deciding questions of unity of invention which may arise in international applications when searched by the United States Patent and Trademark Office (USPTO) as an International Searching Authority and when examined during the national phase in the United States as a Designated Office after entry under 35 U.S.C. 371 in connection with the Patent Cooperation Treaty (PCT).

The May 28, 1986, decision in *Caterpillar Tractor Co. v. Commissioner of Patents and Trademarks,* Civil Action No. 84-1212-A, (E.D. Va.) held the Patent and Trademark office interpretation of 37 CFR 1.141(b)(2) as applied to unity of invention determinations in international applications was not in accordance with the Patent Cooperation Treaty and its implementing legislation. In the Caterpillar international application, the USPTO, when acting as an International Searching Authority, held lack of unity of invention between a set of claims directed to a process for forming a sprocket and a set of claims drawn to an apparatus (die) for forging such a sprocket. The court stated that it was an unreasonable interpretation to say that the expression "specifically designed" as found in PCT Rule 13.2(ii) means that the process and apparatus can only be used with each other as set forth in the Manual of Patent Examining Procedure (MPEP) §806.05(e).

Therefore, in considering international applications as an International Searching Authority and during the national phase as a Designated Office under 35 U.S.C. 371, PCT Rule 13.1 and 13.2 as interpreted in *Caterpillar* will be followed when considering unity of invention of claims of different categories without regard to 37 CFR 1.141. No change is being made in the restriction practice under 37 CFR 1.141(b) and (c) in United States national applications filed under 35 U.S.C. 111 outside the PCT. No change in practice is being made in regard to claims of the same category of invention either in PCT or U.S. national applications. Such a change in U.S. national restriction practices would require a statutory change in the fee levels to cover the additional examining effort required in individual patent applications.

PCT Rules 13.1 and 13.2 are reproduced below:

PCT RULE 13
Unity of Invention

13.1 Requirement

The international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention").

13.2 Claims of Different Categories

Rule 13.1 shall be construed as permitting, in particular, one of the following three possibilities:

(i) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the said product, and the inclusion in the same international application of an independent claim for a use of the said product, or

(ii) in addition to an independent claim for a given process, the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, the inclusion in the same international application of an independent claim for a process specially adapted for the manufacture of the product, and the inclusion in the same international application of an independent claim for an apparatus or means specifically designed for carrying out the process.

PCT Rule 13 only will be applied in the restriction practice used in national phase applications entered under 35 U.S.C. 371 because 35 U.S.C. 372(b)(2) provides that "The Commissioner may cause the question of unity of invention to be reexamined under section 121 of this title, within the scope of the requirements of the treaty and the Regulations".

Guidelines As to Implementation of Revised Unity of Invention Practice in International Applications and National Phase Applications Entered Under 35 U.S.C. 371

(1) The revised practice for international and national phase applications will *not* be used for national applications filed under 35 U.S.C. 111.

(2) The revised practice will *not* affect the treatment of the claims of any applications (national or international) where the question of lack of unity of invention relates to other than different categories of invention issues. Therefore, restriction and unity of invention practice involving, for example, Markush type claims, genus-species, intermediate-final product or combination-subcombination situations are *not* affected for any applications by this notice.

(3) The expression "and as set forth in §§1.141" in 37 CFR 1.481(a) will no longer be considered operative in view of the decision in *Caterpillar Tractor Co.,* supra. The criteria of §1.141 continue to be applicable to U.S. national applications filed under 35 U.S.C. 111 as they were in effect prior to the Caterpillar decision and essentially the same as the practice which was in effect for many years prior to the PCT implementation. That is, practice will continue as set forth in MPEP Chapter 800 as modified in 1046 OG 2 for the practice relating to product, process of making and process of using. The practice in this latter situation is that a three way requirement for restriction can only be required where the process of making is distinct from the product (i.e., the requirements of MPEP 806.05(f) are met). Otherwise, the process of using must be joined with the claims directed to the product and the process of making the product even though a showing of distinctness between the product and process of using the product (MPEP 806.05(h)) could be made. A determination of the patentability of the product need not be made prior to making a requirement for restriction.

(4) The criteria of PCT Rule 13 will be applied when determining unity of invention of claims to different categories of invention in considering international applications as an International Searching Authority and during the national phase as a Designated Office under 35 U.S.C. 371.

(5) The revised practice will apply to all international applications before the PTO as an International Searching Authority in which no search report has been issued

and in all pending national stage applications entered under 35 U.S.C. 371 in which a holding of lack of unity of invention (requirement for restriction) has not been made final by the examiner or acquiesced in by the applicant as of the date of this notice.

(6) In applying PCT Rule 13 to international applications as an International Searching Authority and to national phase applications under 35 U.S.C. 371, examiners will consider for unity of invention all of the claims to different categories of invention in the application and will permit retention in the same application for searching and/or examination, of claims to the categories which meet the requirements of any one of PCT Rule 13.1(i) to (iii).

In view of the court's treatment of the USPTO's distinctness test in Caterpillar, the USPTO will also permit in the same international application the following two combinations:

(a) an independent claim for a given product and an independent claim for a process specially adapted for the manufacture of said product.

(b) an independent claim for a given product and an independent claim for a process of using the said product.

If the different categories of claims do not fall within any *one* of PCT Rule 13.2(i) to (iii) or additional combinations (a) or (b) above, i.e., they claim more or less categories of invention than permitted in any one of PCT Rule 13.2(i) to (iii) or combination (a) or (b) above, unity of invention may not be present. Further, an independent claim for a use in PCT Rule 13.2(i) and combination (b) above is construed as being limited to a claim directed to a process.

In determining unity of invention under PCT Rule 13.2(i) and (iii) and combination (a) above, the examiner will consider the word "specially" which appears before "adapted" to be an emphasis word rather than a limitation. In determining unity of invention under PCT Rule 13.2(ii), the examiner will consider the word "specifically" which appears before "designed" to be an emphasis word rather than a limitation.

Detailed Explanation

Under PCT Rule 13.2, Unity of Invention as to different categories of inventions is covered on the basis of 4 different categories of invention. They are:

A. a product
B. a process (for manufacture)
C. a use of the said product
D. an apparatus or means for carrying out the process for manufacture.

PCT Rule 13.2 provides for grouping of certain of these different categories of inventions and retaining unity of invention.

i. PCT Rule 13.2(i) provides for grouping claims to:

A. a product
B. a process for the manufacture of said product
C. a use of the said product

ii. PCT Rule 13.2(ii) provides for grouping claims to:

B. a process (e.g. for the manufacture of a product)
D. an apparatus or means for carrying out the said process.

iii. PCT Rule 13.2(iii) provides for grouping claims to:

A. a product
B. a process for the manufacture of the product
D. apparatus or means for carrying out the process.

Also permitted by the USPTO are combinations:

(a) A. a product
B. a process for the manufacture of said product

(b) A. a product
C. a use of the said product

If an application includes claims to all the categories of invention set forth in any one of PCT Rule 13.2(i), (ii), (iii), combinations (a) or (b) above, and no additional categories of invention are present, unity of invention exists and no additional search fees should be required or restriction requirement made.

For example, if an application contains claims to only a process for the manufacture of a product and claims to a use of a product and no product claims is present, there is lack of unity of invention since the provisions of Rule 13.2(i) do not apply and the process for manufacture of a product is independent of the use of the product since neither is dependent on the other. Also, if claims to all three categories of PCT Rule 13.2(i) are present at the time of the first Office action and all the product claims are canceled in the response to the first Office action, a requirement for restriction could be made, if appropriate, in the second Office action in view of the independent inventions remaining in the application. PCT Rule 13.2(i) would no longer apply since all three categories of claims would no longer be present in the application. However, the fact that claims to a certain category of invention are unpatentable does not affect the question of unity of invention provided the unpatentable claims are retained in the application.

Where claims to a category of invention in addition to those listed in any one of PCT Rule 13.2(i), (ii), (iii) or combinations (a) or (b) above included in an application, unity of invention may be lacking between the claims drawn to the categories set forth in any *one* of PCT Rule 13.2(i), (ii), (iii) or combinations (a) or (b) above, and the claims to the additional category of invention. For example, if an application contained claims to a process for manufacture, claims to an apparatus or means for carrying out the process and claims to a use of the product manufactured, there could be lack of unity of invention. In such a situation the examiner should group the claims to the process for manufacture and the claims for an apparatus or means for carrying out the process because unity of these two categories exists under PCT Rule 13.2(ii). The claims to the use of the product could be separately grouped if the "use" is shown to be "independent and distinct" of both the "process for manufacture" and the "apparatus or means for carrying out the process" as provided in Chapter 800 of the Manual of Patent Examining Procedure (MPEP).

When the claims presented in an application are directed to several categories of invention so that more than one paragraph of PCT Rule 13.2 and combinations (a) or (b) above applies, the examiner will inspect the claims to see if the categories of invention set forth in PCT Rule 13.2, paragraphs (i), (iii) and (ii), and then combinations (a) or (b) above are present in the application in that order. For example, if the categories of PCT Rule 13.2(i) are found in the application, the claims to those categories stated in PCT Rule 13.2(i) will be considered as one invention and any claims to different categories of invention will be reviewed to determine if they are "independent and distinct" of *all* the claims covered in PCT Rule 13.2(i) in accordance with theprovisions of Chapter 800 of the MPEP.

Under PCT Rule 13.2 and combinations (a) and (b) above, unity will exist where the claims are limited to one invention in each category of invention recited. For example, under PCT Rule 13.2(i), claims are permitted to one product, one process of manufacturing and one use. If multiple products, processes of manufacture or uses are claimed, the first invention in the category first mentioned in the claims will be considered as the elected invention. The first recited invention of each additional category which is related as described in paragraph 7 below with the first invention as indicated in the previous sentence will be considered elected. Accordingly,

for example, if multiple products are claimed, the first recited product is constructively elected and the first recited process, if multiple processes adapted for making and/or using the product are claimed, is also constructively elected. Any such holding by the examiner wil l be made in the form of a restriction requirement in an application entered in the USPTO under 35 U.S.C. 371. Such a restriction requirement would be made on the basis of criteria set forth in MPEP Chapter 800. Applicant would have the right to traverse such a restriction requirement in the response to the Office action.

(7) The inventions recited by the claims of different categories must be drawn to related rather than independent inventions. For example, the product as claimed in PCT Rule 13.2(i) and combinations (a) and (b) above must be able to be made by the claimed process for manufacture and the use claimed must be able to use the claimed product. Likewise in PCT Rule 13.2(ii), the apparatus as claimed must be able to carry out the claimed process. In PCT Rule 13.2(iii), the claimed process of manufacture must be able to make the claimed product and the claimed apparatus or means must be able to perform the claimed process of manufacture.

(8) Applicants should clearly indicate on all application papers filed for entry under 35 U.S.C. 371 and 37 CFR 1.61 that the filing is being made under 35 U.S.C. 371. Otherwise, the application papers will be treated as having been filed under 35 U.S.C. 111.

(9) Any prior notices or policies relating to unity of invention which are inconsistent herewith are superceded to the extent they are inconsistent with this notice.

Appropriate changes in the Code of Federal Regulations will be proposed in due course to adjust the level of the search fees and national fees of §1.445 to recover the cost of searching and examining international applications with claims to different categories of invention in a single international application. The fees were originally set based on the unity of invention practice previously in effect.

If necessary, additional guidance for processing applications under PCT Rule 13 will be issued as experience is gained.

Recordation of Trade Name:
"CHRISTIAN KIM, INC."

Agency: U.S. Customs Service, Department of the Treasury

Action: Notice of Recordation

Summary: On Apr. 28, 1986, a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "CHRISTIAN KIM, INC." was published in the Federal Register (51 FR 15857). The notice advised that before final action was taken on the application, consideration would be given to any relevant data, views, or arguments submitted in opposition to the recordation and received not later than June 27, 1986. No responses were received in opposition to the notice.

Accordingly, as provided in section 133.14, Customs Regulations (19 CFR 133.14), the name "CHRISTIAN KIM, INC." is recorded as the trade name used by Christian Kim, Inc., a corporation organized under the laws of the State of Calif., located at 124 E. Olympic Blvd., Los Angeles, Calif. 90015. The trade name is used in connection with footwear, manufactured in Korea.

Department of Commerce
Patent and Trademark Office
37 CFR Part 2
[Docket No. 40557-6118]
Miscellaneous Amendments of Trademark Rules

Agency: Patent and Trademark Office, Commerce.

Action: Final rule.

Summary: The Patent and Trademark Office is amending the rules of practice in trademark cases to correct two cross-references and a spelling error; to bring §§2.104 and 2.112(a) into conformity with sections 13 and 14 of the Trademark Act; to make §2.114(c), which relates to the withdrawal of a petition for cancellation, consistent with corresponding §2.106(c), which relates to the withdrawal of an opposition; and to specify that the Trademark Trial and Appeal Board may, in its discretion, grant a §2.132(a) motion even if the motion was filed after the opening of the testimony period of the moving party.

Effective Date: Sept. 10, 1986.

For Further Information Contact: Miss Janet E. Rice by telephone at (703) 557-3551 or by mail addressed to the Commissioner of Patents and Trademarks, Attention: Miss Janet E. Rice, Crystal Square 5, Suite 1008, Washington, D.C. 20231.

Supplementary Information: Amendments to §§2.1, 2.101, 2.104, 2.112, 2.114, 2.132, and 2.145 were proposed in a rulemaking notice published in the **Federal Register** on June 11, 1984 at 49 FR 24033 and in the *Official Gazette* of July 3, 1984 at 1044 O.G. 2. Interested parties were requested to submit written comments on or before July 18, 1984. Written comments were submitted by one individual and one organization.

The purpose of these amendments is to make three "housekeeping" corrections; to bring the language of two rules into conformity with the corresponding provi-

sions of the Trademark Act of 1946; and to modify a particular practice.

Several of the rules of practice in trademark cases were amended, effective Feb. 27, 1983, by a final rule notice published in the **Federal Register** on Jan. 28, 1983 at 48 FR 3972 and in the *Official Gazette* of Feb. 22, 1983 at 1027 O.G. 129. A substantial number of other rules of practice in trademark cases were amended, effective June 22, 1983, by final rule notice published in the **Federal Register** on May 23, 1983 at 48 FR 23122 and in the *Official Gazette* of June 21, 1983 at 1031 O.G. 13. As a result of these rule amendments, three further rule amendments of a "housekeeping" nature are now necessary. First, because the rule amendments included changes in some section numbers and in the location of some provisions, the cross-reference portion of §§2.1 and 2.145(d)(1) are being corrected. Second, §2.101(b), as amended effective Feb. 27, 1983, contains a spelling error which is being corrected. Third, §2.114(c), which relates to the withdrawal of a petition for cancellation, is being amended so that it will be consistent with §2.106(c), as amended effective June 22, 1983, which relates to the withdrawal of an opposition.

Additionally, §2.104 (which lists the content requirements for an opposition) and §2.112(a) (which lists the content requirements for a petition for cancellation) are being amended to bring them into conformity with sections 13 and 14 of the Trademark Act. These amendments are being made as a result of a comment contained in the recent case of *Selva & Sons, Inc.* v. *Nina Footwear, Inc.*, 705 F.2d 1316, 217 USPQ 641 (Fed. Cir. 1983). The comment, which appears in footnote 6 at page 648, reads as follows:

> 37 CFR 2.112 commands that a petition for cancellation "set forth a short and plain statement showing how the petitioner is or will be damaged by the registration." This directive is not, however, reflective of 15 USC 1064, which states that a petition to cancel the registration of a mark may be filed "by any person who *believes* that he is or will be damaged by the registration." (Emphasis ours.) Nor is it consistent with recent case law, discussed infra.

Finally, §2.132, as amended effective June 22, 1983, permits any party in the position of defendant to file a motion to dismiss for failure to take testimony where plaintiff has either (1) failed to take testimony or offer any other evidence (§2.132(a)) or (2) offered no evidence other than copies of Patent and Trademark Office records and such evidence is insufficient to show that upon the law and the facts plaintiff is entitled to relief (§2.132(b)). Paragraph (c) of the section, adopted effective June 22, 1983, provides that any motion filed under paragraph (a) or (b) must be filed before the opening of the testimony period of the moving party. However, in those cases where a plaintiff's testimony period has expired and plaintiff has in fact failed to take testimony or offer any other evidence in his behalf, it is in the interests of justice and judicial economy to grant a motion to dismiss under §2.132(a) even if the motion was not filed until after the opening of the defendant's testimony period. Accordingly, the Patent and Trademark office is amending Rule §2.132(c) to specify that the Trademark Trial and Appeal Board may grant such a motion even if the motion was not filed until after the opening of the testimony period of the moving party.

Discussion of Specific Sections Being Changed

Section 2.1 provides in part that §§1.1 to 1.26 of Part I of Title 37 of the Code of Federal Regulations are applicable to trademark cases except such parts thereof which specifically refer to patents and except §1.22 to the extent that it is inconsistent with §§2.85(e), 2.101(c) or 2.162(d). However, the pertinent provisions in §2.101(c) were relocated in modified form in §2.101(d) by amendment effective Feb. 27, 1983. Further by amendment effective Feb. 27, 1983, §2.111(c) adopted provisions which amplify that part of §2.85(e) relating to petitions for cancellation. Accordingly, the cross-reference portion of §2.1 is being amended by changing "§2.101(c)" to "§2.101(d)" and by adding a cross-reference to §2.111(c).

Section 2.101(b) is being amended by changing the spelling of the word "Principle" to "Principal".

Section 2.104 is being amended by deleting the requirement that the opposition "set forth a short and plain statement showing how the opposer would be damaged by the registration of the opposed mark" and substituting therefor a requirement that the opposition "set forth a short and plain statement showing why the opposer believes he would be damaged by the registration of the opposed mark." The subsitute requirement is in conformity with Section 13 of the Trademark Act, which states that any person "who believes that he would be damaged by the registration of a mark upon the principal register" may file an opposition in the Patent and Trademark Office.

Section 2.112(a) is being amended by deleting the requirement that the petition to cancel "set forth a short and plain statement showing how the petitioner is or will be damaged by the registration" and substituting therefor a requirement that the petition to cancel "set forth a short and plain statement showing why the petitioner believes he is or will be damaged by the registration." The substitute requirement is in conformity with section 14 of the Trademark Act, which states that a petition to cancel the registration of a mark may be filed "by any person who believes that he is or will be damaged by the registration."

Section 2.114(c), which provides in part that after an answer to a petition for cancellation is filed the petition may not be withdrawn without prejudice except with the consent of the registrant, is being amended to require the *written* consent of the registrant. The requirement is in conformity with the existing practice under § 2.114(c) and consistent with §2.106(c), which, as amended effective June 22, 1983, provides in part that after the answer to an opposition is filed, the opposition may not be withdrawn without prejudice except with the written consent of applicant.

Section 2.132(c), which provides that any motion filed under paragraph (a) or (b) of the section must be filed before the opening of the testimony period of the moving party, is being amended to specify that the Trademark Trial and Appeal Board may in its discretion grant a motion filed under paragraph (a) even if the motion was filed after the opening of the testimony period of the moving party.

Section 2.145(d)(1), which governs the time for filing an appeal to the U.S. Court of Appeals for the Federal Circuit or for commencing a civil action, provides in part that if a request for rehearing or reconsideration or modification of the decision is filed within the time specified in §2.129(c) or §2.144, or within any extension of time granted thereunder, the time for filing an appeal or commencing a civil action shall expire at the end of the sixty-day period or thirty days after action on the request, whichever is later. Prior to June 22, 1983, §2.129(c) governed the filing of any request for rehearing or reconsideration or modification of a decision of the Trademark Trial and Appeal Board, including a decision on a motion which is finally dispositive of a case. However, under the trademark rules as amended effective June 22, 1983, a request for rehearing or reconsideration or modification of a decision issued after final hearing is governed by §2.129(c), but a request for rehearing, etc., of a decision on a motion which is finally dispositive of a case is governed by §2.127(b). Accordingly, §2.145(d)(1) is being amended to include a cross-reference to §2.127(b).

Response to Comments on the Rules

Comments responding to the notice of proposed rulemaking were submitted by the committee of one or-

ganization and by one individual. These comments have been given careful consideration. However, the only suggested modification has not been adopted.

Comment: The organization's committee indicated that while it believed that so me of the proposed amendments would have a substantive effect on practice before the Patent and Trademark Office, it found no reason not to endorse their enactment.

Response: The Patent and Trademark Office agrees that some of the amendments will have a substantive effect on practice before the Office.

Comment: With respect to the proposal to amend §§2.104 and 2.112(a) to bring them into conformity with the language of sections 13 and 14 of the Act relating to standing, i.e., to require that an opposition and a petition for cancellation, respectively, set forth a short and plain statement showing why the plaintiff believes he would be damaged by the registration of the mark in question, one individual, noting ". . . the recent changes in the 'standing' doctrine from a 'damage' showing to a 'real interest in the proceeding' showing, . . .", suggested that it might be less confusing if the two rules were amended to provide that opposers and petitioners must set forth a statement showing why (or how) they have " a real interest in the proceeding" rather than why they believe they will be damaged.

Response: The suggested modification is appealing because it reflects current case law. Nevertheless, since case law interpretation of statutory provisions is subject to change, it is concluded that the better approach is to incorporate into the rules the statutory wording, rather than case law language. Further, inasmuch as the "real interest" language is a legal concept which has no specific meaning apart from case law, it appears that the statutory "belief in damage" language is the more readily understandable way of expressing the standing requirement. Accordingly, the suggested modification has not been adopted.

Environmental, energy, and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The General Counsel has certified to the Chief Counsel for Advocacy, Small Business Administration, that the rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The rule change includes no additional or increased fees. Substantive rights to use valuable trademarks are not adversely affected.

This rule change does not contain a collection of information requirements under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions. There will be no significant, adverse effects on competition, employment, investment, productivity, innovation, or on the ability of UStates-based enterprises to compete with foreign based enterprises in domestic or export markets.

List of Subject Terms in 37 CFR Part 2

Administrative practice and procedures, Courts, Lawyers, Trademark.

After consideration of the comments received and pursuant to the authority contained in Section 41 of the Trademark Act of July 5, 1946, as amended, and in 35 U.S.C. 6, Part 2 of Title 37 of the Code of Federal Regulations is amended as set forth below.

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

1. The authority citation for Part 2 is revised to read as follows:

Authority: 15 U.S.C. 1123, 35 U.S.C. 6, unless otherwise noted.

2. Section 2.1 is revised to read as follows:

§2.1 Sections of Part 1 applicable.

Sections 1.1 to 1.26 of this chapter are applicable to trademark cases except such parts thereof which specifically refer to patents and except §1.22 to the extent that it is inconsistent with §§2.85(e), 2.101(d), 2.111(c) or §2.162(d). Other sections of Part 1 incorporated by reference or referred to in particular sections of this part are also applicable to trademark cases.

3. Section 2.101 is amended by revising paragraph (b) to read as follows:

§2.101 Filing an opposition.

* * * * *

(b) Any person who believes that he would be damaged by the registration of a mark on the Principal Register may oppose the same by filing an opposition which should be addressed to the Trademark Trial and Appeal Board.

* * * * *

4. Section 2.104 is revised to read as follows:

§2.104 Contents of opposition.

The opposition must set forth a short and plain statement showing why the opposer believes he would be damaged by the registration of the opposed mark and state the grounds for opposition. A duplicate copy of the opposition, including exhibits, shall be filed with the opposition.

5. Section 2.112 is amended by revising paragraph (a) to read as follows:

§2.112 Contents of petition for cancellation.

(a) The petition to cancel must set forth a short and plain statement showing why the petitioner believes he is or will be damaged by the registration, state the grounds for cancellation, and indicate the respondent party to whom notification shall be sent. A duplicate copy of the petition, including exhibits, shall be filed with the petition.

* * * * *

6. Section 2.114 is amended by revising paragraph (c) to read as follows:

§2.114 Answer.

* * * * *

(c) The petition for cancellation may be withdrawn without prejudice before the answer is filed. After the answer is filed, the petition may not be withdrawn without prejudice except with the written consent of the registrant.

7. Section 2.132 is amended by revising paragraph (c) to read as follows:

§2.132 Involuntary dismissal for failure to take testimony.

* * * * *

(c) A motion filed under paragraph (a) or (b) of this section must be filed before the opening of the testimony period of the moving party, except that the Trademark Trial and Appeal Board may in its discretion grant a motion under paragraph (a) even if the motion was filed after the opening of the testimony period of the moving party.

8. Section 2.145 is amended by revising paragraph (d)(1) to read as follows:

§2.145 Appeal to court and civil action.

* * * * *

(d) Time for appeal or civil action. (1) The time for filing the notice of appeal to the U.S. Court of Appeals for the Federal Circuit (paragraph (b) of this section), or for commencing a civil action (paragraph (c) of this section), is sixty days from the date of the decision of the Trademark Trial and Appeal Board or the Commissioner, as the case may be. If a request for rehearing or reconsideration or modification of the decision is filed within the time specified in §§2.127(b), 2.129(c) or 2.144, or within any extension of time granted thereunder, the time for filing an appeal or commencing a civil action shall expire at the end of the sixty day period or thirty days after action on the request, whichever is later. The sixty and thirty day periods may be extended by the Commissioner upon a showing of sufficient cause.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
